

TECNOMETAL
Handcraft Workings

I design,
build and
develop.

over
25 years
of artisan
passion.

Carlo Minio - Owner

In **my workshop** I design, build and develop.
The most recent technologies meet over **25 years of artisan passion.**

INSPIRED BY DESIGN

Aesthetics and quality are at the center of all my work.
My workings are furnishing accessories:
they complete and enrich the beauty that your house will have.

ARTISAN PRODUCTION

In order to guarantee the integrity and durability of the products, I keep all the production processing handcrafted. After the machines make rough cuts to the profiles, each element is polished and finished by hand to achieve the perfection in every detail.

MADE WITH PASSION

High quality craftsmanship goods, style and functionality.
All made using processing methods that have nothing industrial.
The result? Customized products, made to last over time. Made to enrich.

I create
artifacts
to reflect
your good taste.

Creating is the spirit from which Tecno Metal was born.
An artisan workshop, in love with its work, obsessed with quality.
Nothing is left to chance: I carry out every order with care and passion.

PVC frames

PVC

It has different strengths: thermal and acoustic insulation, durability, resistant to fire and weather-proof.

ORIGINS

Designed, built and finished by Tecno Metal - Carlo Minio.

MATERIALS & FINISHES

The surface finishes are made of films with an extraordinary aesthetics and durability, such as the various wood effects, fantastic to the eye and to the touch. Mass colors are defined by the same color of the blend.

AESTHETIC LINES

Flat or rounded with more insulating chambers and triple glazing.

PERFORMANCES

Maximum thermal and acoustic insulation, wide choice of finishes, high-level design, strength and structural stability, easy maintenance, durability and durability, recyclability of materials, energy saving.

CONSIDERATIONS

All Tecno Metal products have a suitability certificate as they are related to the static tests for each product used in the implementation phases. Ours are special and niche products, intended for a select and demanding clientele, therefore all the process, from construction to installation, is executed in a careful and accurate way by the owner himself, thus ensuring greater functionality and greater product warranty.

My environment lives
of the flavors of traditional craftsmanship.
A small and highly qualified environment,
where heart, mind and hands get married
together with Steel, Iron, Glass, Hanex, Pvc, Aluminum.
The result is something that satisfies the eyes and the soul.
A small workshop, for great products.

Carlo Minio
