

I design,
build and
develop.

over
25 years
of artisan
passion.

Carlo Minio - Owner

In **my workshop** I design, build and develop.
The most recent technologies meet over **25 years of artisan passion**.

INSPIRED BY DESIGN

Aesthetics and quality are at the center of all my work.
My workings are furnishing accessories:
they complete and enrich the beauty that your house will have.

ARTISAN PRODUCTION

In order to guarantee the integrity and durability of the products, I keep all the production processing handcrafted. After the machines make rough cuts to the profiles, each element is polished and finished by hand to achieve the perfection in every detail.

MADE WITH PASSION

High quality craftsmanship goods, style and functionality.
All made using processing methods that have nothing industrial.
The result? Customized products, made to last over time. Made to enrich.

I create
artifacts
to reflect
your good taste.

Creating is the spirit from which Tecno Metal was born.
An artisan workshop, in love with its work, obsessed with quality.
Nothing is left to chance: I carry out every order with care and passion.

Hanex[®]/Corian[®]

Custom Hanex/Corian Pool

Hanex® solid surfaces, consisting of 2/3 of rock mineral and 1/3 of methyl methacrylate, is a resistant material, homogeneous in all its thickness and it preserves its original appearance unchanged over time.

ORIGINS

Designed, built and finished by Tecno Metal - Carlo Minio.

MATERIALS & FINISHES

Inox Steel and Hanex / Corian.

Accessories

Inox Steel.

AESTHETIC LINES

Thermoformed.

CONSIDERATIONS

All Tecno Metal products have a suitability certificate as they are related to the static tests for each product used in the implementation phases. Ours are special and niche products, intended for a select and demanding clientele, therefore all the process, from construction to installation, is executed in a careful and accurate way by the owner himself, thus ensuring greater functionality and greater product warranty.

Custom Hanex/Corian Pool

Hanex® solid surfaces, consisting of 2/3 of rock mineral and 1/3 of methyl methacrylate, is a resistant material, homogeneous in all its thickness and it preserves its original appearance unchanged over time.

ORIGINS

Designed by the technical designer.
Designed, built and finished
by Tecno Metal - Carlo Minio.

MATERIALS & FINISHES

Inox Steel and Hanex/Corian

Accessories

Inox Steel.

AESTHETIC LINES

Flat, shaped, with desired shapes
and size.

CONSIDERATIONS

All Tecno Metal products have a suitability certificate as they are related to the static tests for each product used in the implementation phases. Ours are special and niche products, intended for a select and demanding clientele, therefore all the process, from construction to installation, is executed in a careful and accurate way by the owner himself, thus ensuring greater functionality and greater product warranty.

Custom staircases

Safe, solid and comfortable in all kinds: spiral, helicoidal and open, modern, depending on the context.

ORIGINS

Designed, built and finished by Tecno Metal - Carlo Minio.

MATERIALS & FINISHES

Stainless steel, glass and Corian.

Accessories

Laminated glass balustrade extra clear tempered.
Steps covered in Corian with marble finish.

AESTHETIC LINES

Straight and shaped design as a wall angle.

PERFORMANCES

Staircase with lateral self-supporting structure for greater strength and structural stability.

CONSIDERATIONS

All Tecno Metal products have a suitability certificate as they are related to the static tests for each product used in the implementation phases. Ours are special and niche products, intended for a select and demanding clientele, therefore all the process, from construction to installation, is executed in a careful and accurate way by the owner himself, thus ensuring greater functionality and greater product warranty.

Custom staircases

Safe, solid and comfortable in all kinds: spiral, helicoidal and open, modern, depending on the context.

ORIGINS

Designed, built and finished by Tecno Metal - Carlo Minio.

MATERIALS & FINISHES

Steel structure.

Accessories

Steps covering in Corian.
Clear tempered laminated glass balustrade. Glass holder in Inox Steel

AESTHETIC LINES

Straight and shaped design as a wall angle.

PERFORMANCES

Suspended cantilever staircase, designed to be made also on non-load-bearing walls, ensuring the same solidity and safety.

CONSIDERATIONS

All Tecno Metal products have a suitability certificate as they are related to the static tests for each product used in the implementation phases. Ours are special and niche products, intended for a select and demanding clientele, therefore all the process, from construction to installation, is executed in a careful and accurate way by the owner himself, thus ensuring greater functionality and greater product warranty.

Hanex/Corian

Hanex® solid surfaces, consisting of 2/3 of rock mineral and 1/3 of methyl methacrylate, is a resistant material, homogeneous in all its thickness and it preserves its original appearance unchanged over time.

ORIGINS

Designed by Sadun.
Built and finished by hand
by Tecno Metal - Carlo Minio.

REFINED DESIGN

Hanex® offers unique features such as infinite design flexibility, extremely easy cleaning and above all the possibility to restore the surface in case of any scratches or stains. Hanex® is the best solidsurface for thermoforming.

AESTHETIC LINES

Flat, shaped, with desired shapes and size.

CONSIDERATIONS

All Tecno Metal products have a suitability certificate as they are related to the static tests for each product used in the implementation phases. Ours are special and niche products, intended for a select and demanding clientele, therefore all the process, from construction to installation, is executed in a careful and accurate way by the owner himself, thus ensuring greater functionality and greater product warranty.

My environment lives
of the flavors of traditional craftsmanship.
A small and highly qualified environment,
where heart, mind and hands get married
together with Steel, Iron, Glass, Hanex, Pvc, Aluminum.
The result is something that satisfies the eyes and the soul.
A small workshop, for great products.

Carlo Minio
