

TECNOMETAL
Handcraft Workings

I design,
build and
develop.

over
25 years
of artisan
passion.

Carlo Minio - Owner

In **my workshop** I design, build and develop.
The most recent technologies meet over **25 years of artisan passion.**

INSPIRED BY DESIGN

Aesthetics and quality are at the center of all my work.
My workings are furnishing accessories:
they complete and enrich the beauty that your house will have.

ARTISAN PRODUCTION

In order to guarantee the integrity and durability of the products, I keep all the production processing handcrafted. After the machines make rough cuts to the profiles, each element is polished and finished by hand to achieve the perfection in every detail.

MADE WITH PASSION

High quality craftsmanship goods, style and functionality.
All made using processing methods that have nothing industrial.
The result? Customized products, made to last over time. Made to enrich.

I create
artifacts
to reflect
your good taste.

Creating is the spirit from which Tecno Metal was born.
An artisan workshop, in love with its work, obsessed with quality.
Nothing is left to chance: I carry out every order with care and passion.

Corten steel

Custom staircases

Safe, solid and comfortable in all kinds: spiral, helicoidal and open, modern, depending on the context.

ORIGINS

Designed, built and finished by Tecno Metal - Carlo Minio.

MATERIALS & FINISHES

Cor-ten steel.

Accessories
Cor-ten steel.

AESTHETIC LINES

Straight and shaped design as a wall angle.

PERFORMANCES

Staircase with lateral self-supporting structure for greater strength and structural stability.

CONSIDERATIONS

All Tecno Metal products have a suitability certificate as they are related to the static tests for each product used in the implementation phases. Ours are special and niche products, intended for a select and demanding clientele, therefore all the process, from construction to installation, is executed in a careful and accurate way by the owner himself, thus ensuring greater functionality and greater product warranty.

Corten steel

Resistant to corrosion, it has become the favorite material for some designers and artists for the realization of furnishing and works of art.

ORIGINS

Designed by the technical designer. Designed, built and finished by Tecno Metal - Carlo Minio.

MATERIALS & FINISHES

Sheet and structure in Corten Steel.

Accessories
Corten Steel.

AESTHETIC LINES

Minimal line.
Assembly of geometric shapes, rhombuses and triangles to obtain the splinter effect.

PERFORMANCES

The sheets with an applied static load of 80 Kg/m did not undergo permanent breakage or deformation.

CONSIDERATIONS

All Tecno Metal products have a suitability certificate as they are related to the static tests for each product used in the implementation phases. Ours are special and niche products, intended for a select and demanding clientele, therefore all the process, from construction to installation, is executed in a careful and accurate way by the owner himself, thus ensuring greater functionality and greater product warranty.

My environment lives
of the flavors of traditional craftsmanship.
A small and highly qualified environment,
where heart, mind and hands get married
together with Steel, Iron, Glass, Hanex, Pvc, Aluminum.
The result is something that satisfies the eyes and the soul.
A small workshop, for great products.

Carlo Minio
